Module	Date	Topic	Problem Sets	Reading
Math Camp	August 25			
	August 27			
	September 1			
	September 3			
Computing	September 8	Introduction to Computing	PS 1	
	September 10	Introduction to R		
Objectives and Foundations	September 16	Causal Effects with Randomized Experiments		Mostly Harmless Ch. 1-2
	September 17	Moments and Descriptive Statistics		
Intro to Regression	September 22	Regression Fundamentals	PS 2	Explain or Predict Gelman Ch. 6-7
	September 24	Multiple Regression		Gelman Ch. 10.
Mathematics of Regression	September 29	Ordinary Least Squares	PS 3	Greene Ch. 3.2
	October 1	Assumptions of the Linear Regression Model		Greene Ch. 2.3, Gelman Ch. 11.1
Statistical Inference	October 6	Statistical inference		Gelman Ch. 4
	October 8	Statistical inference with regression		Greene 5.1-5.3
Midterm	October 13	Midterm		
Model Evaluation and Diagnostics	October 15	Statistical inference		Greene Ch. 6
	October 20	Model Specification		Greene Ch. 7
	October 22	Model Specificaiton	PS 4	
	October 27			
Extensions of Linear Models	October 29	Model Specification		
	November 4	Diagnostics and Evaluation	PS 5	
	November 5	Diagnostics and Evaluation		
Data and Model Challenges	November 10	Diagnostics and Evaluation		
	November 12	Binary and Ordinal outcomes	PS 6	
	November 17	Binary and Ordinal outcomes		
Wrap Up	November 19	Instrumental Variables		
	November 24	Inference to the Best Explanation		What good is a regression?
	November 26	Thanksgiving		
	December 1	Redefine day		
	December 3	Review		
	December 7	Final Exam: 12:30-2:30
